

Technologies

PuraFlow uses state-of-the-art water treatment technologies in all of its water systems. This allows **PuraFlow** to design systems that are highly effective and environmentally friendly.

Several primary medias that are used, depending on what **PuraFlow** system is selected are:

Absorption Media – for the reduction of bad odors, tastes and chlorine.

Anti-Scaling Media – scale inhibitor that can reduce the negative effects of hard water.

Ion Exchange Media – cation resin that removes water hardness from your water supply.

Benefits

- Environmentally friendly
- Save money with no more bottled water
- No plastic bottles that pollute our environment
- Quality water from every faucet throughout your entire home
- Easy installation
- Protect your home's plumbing, fixtures and appliances
- Virtually no maintenance
- No monthly or annual service contracts or maintenance fees
- Green technologies at work for you
- Clean filtered and conditioned water

PuraFlow, Inc. is a premier manufacturer of point-of-entry and point-of-use water treatment systems.

For over a decade, **PuraFlow** has supplied customers worldwide with high quality water systems that provide clean, fresh great tasting water.
